Thinkstream Services Prices and Descriptions

Product	Unit Type	License Fee Non-Recurring	Product Overview
Web Based Street Smart / Desktop Detective Applications			
Street Smart Patrol / Web Based	Per User	$500	The Street Smart Patrol Application includes the same Thinkstream total justice search capabilities available in the Street Smart Standard client application, however it is designed specifically as a Web based application. Note that messaging and other services which are available in the Client version are not included in the web based Patrol Application. This version is designed specifically for inquiries only. If electronic reporting and messaging is desired then an upgrade to the Street Smart Client version is required.
Desktop Detective / Web Based	Per User	$500	Query solution designed specifically for detectives.
Street Smart			
Street Smart Standard/ Client Based	Per User	$750	The Thinkstream Street Smart Client is a total mobile solution for the law enforcement officer. It includes the Thinkstream total justice search consisting of simultaneous queries of hundreds of justice databases returned in a user friendly set of aggregated results. The standard version also includes Instant Messaging, Thinkstream agency specific Email Messaging and many different types of Alerts and BOLO's.
Electronic Reporting Applications (Multiple form bundle pricing available)			
E-Citation			
Electronic Citations **(Stand Alone Version)**	Per User	$1,500	The Thinkstream E-Citation application is a complete solution for the end-to-end citation process. The base application includes a mobile interface where an officer can initiate the Thinkstream Wizard driven Citation Report. The package includes both the laptop version in addition to the PDA application. Agencies may decide to utilize only the laptop application or only the PDA. In either case we include a connection to your State Motor Vehicle database which will enable the officer to populate the citation with a persons driver and owner information directly from the source saving valuable time. In addition to the mobile solution the package also comes complete with a very comprehensive backend management system which enables all tasks related to managing a citation within an agency. The Citation Management System also allows the agency administrator to set up different types of roles and rights to restrict or allow the users to perform or view different tasks. Finally the Citation Management System will allow single or batch XML exports to the agency RMS or Court CMS.
Electronic Citations **(with upgrade to Street Smart)**	Per User	$2,000	
Crash Reporting			
Crash Reporting	Per User	$1,500	The Thinkstream Electronic Crash Reporting application is a complete solution for the end-to-end crash reporting process. The base application includes a mobile interface where an officer can initiate the Thinkstream Wizard driven Crash Report. It will provide for a mobile client in which to launch the report, a connection to your State Motor Vehicle database which will enable the officer to populate the report with person or vehicle information directly from the source and an inbox to manage the workflow of the reports from the agency to the field. The backend system includes full supervisor approval / rejects capabilities including supervisor comments to be added straight to the report. The reports can be set up with full validation rules which can be specified by the agency.
Crash Reporting **(with upgrade to Street Smart)**	Per User	$2,000

Incident Reporting			
Incident Reporting	Per User	$1,500	The Thinkstream Incident Reporting application is a complete solution for the end-to-end Incident reporting process. The base application includes a mobile interface where an officer can initiate the Thinkstream Wizard driven Incident Report. It will provide for a mobile client in which to launch the report, a connection to your State Motor Vehicle database which will enable the officer to populate the report with person or vehicle information directly from the source and an inbox to manage the workflow of the reports from the agency to the field. The backend system includes full supervisor approval / rejects capabilities including supervisor comments to be added straight to the report. The reports can be set up with full validation rules which can be specified by the agency.
Incident Reporting (with upgrade to Street Smart)	Per User	$2,000	
Additional Services and Applications for Street Smart			
Street Smart Dispatch Client	Per Agency	$5,000	The Street Smart Dispatch Client is an application designed for specific use with the Thinkstream Street Smart Standard and Full Clients. This application will reside at the dispatcher's workstation and is the main interface for communication between the dispatchers and the field units. Note that this is not a CAD system; however, the dispatcher will have the ability to communicate via Instant Messaging and also has the capability to send out Alerts, Email type Messages and BOLO's.
Electronic Reporting Custom Integration to Agency Systems	Per Connection (one time fee, annual maint. Required)	$5,000 plus	The standard Electronic Reporting applications provide for an XML export to be sent out to agency RMS or Court systems. The respective system would be required to receive and populate their system from the XML. This solution would provide for Thinkstream to write a custom provider to actually write to the agency system directly.
Thinkstream All the CAD you need			
Base System	Per Agency	$25,000	Enables dispatchers to track calls for fast and effective responsiveness of public safety emergency teams. Hardware not included.
Add Incident Mapping Solution	Per Agency	$5,000	Mapping solution that will allow dispatchers to display active incidents on a map. Also allows for mapping of historical incidents.
Add AVL Mapping Solution	Per Agency	$7,500	Includes all features of Incident mapping with the added capabilities of Auto Vehicle Locate. (Note: does not include GPS hardware required for mobile units)
All the CAD you need Mobile Solution	Per User	$500	Mobile application installed in MDC's to allow CAD calls to be sent down to units. Hardware not included. Note this annual user fee does not include access to Street Smart. This fee only enables the calls to service to be sent down to the unit. To upgrade Easy CAD Mobile to full Street Smart see the additional fee below.
Upgrade All the CAD you need Mobile with Street Smart	Per User	$750	Same features as above with the added benefit of the Thinkstream Street Smart solution. Hardware not included.

Laptop LineUp Application			
1 to 5 User Agencies	Per Agency Annual Fee	$1,500	The Thinkstream Lineup application is an easy-to-use tool that will enable authorized law enforcement personnel to quickly and simply create and display multi-person lineups directly in their web browser either in the office or in the field. Once the suspect's photo is imported into the application, Thinkstream Lineup will quickly search and retrieve a 6 or 8 person lineup from other similar photos from the included repository of over a million mugshot photos. The officer will simply input the suspects descriptive information and the application will quickly bring back photos matching the suspects description. The created lineup can then be used for suspect matching and other purposes right from the browser.
6 to 10 user Agencies		$2,000	
11 to 21 User Agencies		$2,750	
21 to 30 User Agencies		$3,500	
31 to 100 User Agencies		$5,000
