WIRELESS CUSTOM SOLUTIONS		
Product Photo	Description	List Price (\$ USD)
	Custom-configured Wireless Intercom System. Firecom can integrate and configure wireless headsets, base stations, intercoms, and portable ComHubs to your needs. Systems can serve up to 60 users across a variety of physical locations and can integrate with one or more land or marine mobile or portable radios. Headset functions can be programmed to your specifications. We can package battery-powered portable systems into completely self-contained weatherproof cases for storage, transportation, and use. We can also implement systems that work over any combination of fixed, vehicular/boat, and portable installations. Contact Firecom for details.	 Call for Quote
	The ComHub is fully portable, and designed to interface with the radio as seamlessly as a wired headset. Housed in a watertight enclosure with simple on/off operation. 20hr rechargeable NiMH battery with included charger. Configurable for 1 to 8 users.	 Call for Quote

# US/CANADA COMCARE™ PRICE LIST

January 1, 2012

## ComCare™ Service

ComCare Service Programs provide additional customer support and product services for Sonetics equipment beyond the original manufacturer's warranty coverage. ComCare Service Programs are limited to eligible products purchased by businesses and other organizations in the USA and Canada (including governmental entities) and are not available to individual consumers.

### Overview and options

ComCare pricing varies according to length of coverage, speed of service and support, and product group. Return shipping time to customer is valid for USA only. ComCare Service is available only to the original product owner and is not transferable. ComCare must be purchased with the product or within 90 days of product purchase. The full statement of ComCare Service coverage is printed on the Certificate of Coverage shipped with each covered product. Standard terms are available on our Web site. Coverage is available for 3 or 5 years, and runs concurrently with the standard warranty period. Both the standard warranty and ComCare coverage start on the original date of purchase. Two speed-of-service and support options are available:

The Accelerated Option Includes:

- 5-day (or faster) repair time with 2-day (USA only) return shipping to customer;
- Same- or next-day technical support during technical support hours; and
- 25% discount on non-warranty repair or service.

The Expedited Option Includes:

- 2-day (or faster) repair time with overnight (USA only) return shipping to customer;
- Same day technical support during technical support hours; and
- 50% discount on non-warranty repair or service.
