Honeywell Sales Policy Summary

The Honeywell Sales Order Policy is a reference guide within the price book as it relates to common definitions, terms and conditions.

Where existing signed contracts or order acknowledgements stipulate different terms and conditions, those documents preside.

Part numbers, or SKUs, are categorized by one of the four groups:

- **Stocking:** products have high sales run-rate, distributors should be stocking these
- **Standard:** products have moderate sales run-rate, discretion left to distributors on whether to stock
- **Non-Standard:** products are primarily project-based, discretion left to distributors on whether to stock
- **Custom:** products are unique to specific customers and only for sale to the identified customer

Ordering policies for each of the four categories are described below:
