## BLUETOOTH ADAPTER KITS FOR MOBILE RADIOS

Pryme BLU BT Mobile Kits have recently been upgraded. These new kits eliminate the Cigarette Plug adapter and now provide Receive audio in addition to Transmit audio. As before all adapters are available with either remote wired, footswitch, PTT or wireless (Bluetooth PTT). Also note that most of these new adapters plug into the rear accessory connector of the radio but sometimes radio programming needs to be modified and the speaker microphone can still be used on these models. However on some models the adapter has to use both rear speaker jack and front microphone connector and these versions are indicated by the letter J in the part number. **CLICK ON PICTURE FOR WEB LINK TO FIND OUT MORE.**
